ANNOUNCEMENT.

We take pleasure in announcing to our many friends and patrons the transfer of our fruit and nursery business to the BUTLER & JEWELL COMPANY, incorporated under the laws of the state of Connecticut. As the members of the former partnership are the largest stockholders and the managers of the business of the present corporation, we feel that it is entitled to the same confidence and patronage it has been our pleasure to receive in the past. Very truly,

Butler & Jewell.

To Our Patrons.—Believing that the attempt of the former management to sell honest goods at living prices has been the prime cause of the large increase of trade, and that practical fruit growers prefer goods of *known merit* at reasonable prices, rather than untried novelties at outrageous prices, we submit to our customers and friends our tenth catalogue of tested fruits. While it may resemble former editions, we claim for it freedom from the stereotyped puffs of high-priced novelties (of which the dealer knows nothing except he is to receive a large commission for pushing sales) which fill the catalogues of many of our older competitors. We give our own experience as commercial fruit growers with the varieties we offer.

The high standard of all goods sent out from this nursery in the past shall be fully maintain-

ed. We propose to grow the best stock possible, which is the only stock fit to buy and set.

We are in better position than ever before to handle our steadily increasing share of the nursery trade in New England and vicinity, filling orders promptly and correctly.

Space is so limited in our little catalogue it would hardly prove profitable for our customers to occupy much of it telling how good, kind and smart we are, suffice it to say, the business started by a school-boy fourteen years ago has grown steadily, in the same locality, and the integrity of its management, or its stability are unquestioned, either by its patrons or competitors. Neither is it necessary to occupy space with complimentary letters in regard to stock received from us, although appreciated for their friendliness by us. They are not of such rare occurrence as to upset us, or unfit us for business for the rest of our natural lives.

The customer must pay for advertising expenses. Would you rather pay for a brief description of the goods we have to sell and you wish to know about, or a large illuminated book, painting ourselves in glowing colors, very gratifying to our vanity, and extremely amusing to our friends and neighbors who know us as we are? *This book delivered to you costs one and a half cents, of which two-thirds goes to make up Uncle Samuels deficit in the postal service.*

From you who have not as yet purchased of us we solicit a trial order, believing we can supply you *better stock* at a saving of from 100 per

cent. to 1,000 per cent. on the prices of any travelling agent, and have stock reach you in *fresher* condition.

We refer you without any hesitation to your neighbor who has been our regular customer for years. Look him up, he lives near by, or when possible we would like to have our customers examine our stock before buying, and satisfy themselves as to its quality, and that it is *perfectly pure and true to name*.

We guarantee all goods true to label, and will hold ourselves responsible to the full price of goods.

We employ intelligent help who can read and talk United States. If we did not we could not make the above guarantee.

Order Early—It will be a great help to us to have our orders in early, and although our prices are so low we cannot offer a very large inducement, we have decided to allow our customers whose orders (with remittance) are received prior to March 10th, to select 5 per cent. additional stock *free*

When we cannot supply the variety ordered, we will refund the money, unless requested to substitute some other variety.

At prices named, goods are carefully packed in moss and straw, well baled or boxed, and delivered to forwarders, after which our responsibility ceases, except for errors in filling, which must be reported within five days after receipt of goods, to admit of adjustment.

Money Order, Telegraph, Express, and Freight office, Cromwell, Conn.

Orders amounting to \$10.00 will be delivered at any freight station in Connecticut without additional expense. Special figures on large orders.

Terms Cash.

How far do we ship? Just as far as we have orders to. But the farther you live from us the earlier you should have your goods shipped, as after growth commences plants should not be out of the ground any longer than possible.

Plants are shipped same day they are dug. Any one who has had any experience in setting plants knows what an advantage this is.

Six plants at dozen rates, 50 at 100 rates, and 500 at 1,000 rates.

Berry plants mailed free at dozen rates. All large orders by express or freight at purchaser's expense.

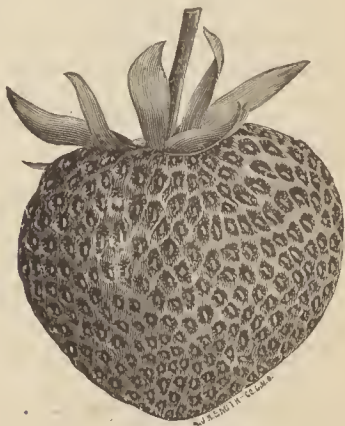

N. B.—The prices on Strawberry plants do not apply during July, August and September. The digging of plants at this season is much more expensive, and means the destruction of innumerable young plants. During the summer we positively cannot afford to dig into our beds for any such prices. Summer price list on application.

STRAWBERRIES.

P. pistillate. B. bi-sexual or perfect flowering.

Bubach (P)—This is a beautiful, large and productive early variety. No other variety as

large is so early and productive. Too soft for long shipment, but is a fine variety for near markets. While a vigorous grower and a remarkably robust and healthy plant, it makes but few runners and consequently those who offer true stock must ask a higher price than for other well known varieties. Per dozen, 25c; 100, 75c; 1000, \$5.

BRANDYWINE.

BRANDYWINE (B)—A very promising variety which has been quite generally tested and has given almost universal satisfaction. Plant vigorous, large, healthy, hardy and productive. Berries large, late, roundish conical, regular, uniform in size, handsome in color, and excel-

lent in quality. Popular for home use or market. Per dozen, 25c; 100, 50c; 1000, \$3.50.

CLYDE (B)—Very vigorous grower and exceedingly strong plant. A prodigious bearer of good sized, sweetish berries, which will sell readily if not too light colored and soft, which we fear it may prove when grown in heavy matted rows on light soil. Per dozen, 25c; 100, 50c; 1000, \$4.

COLUMBIAN (B)—A strong growing, deep rooted plant of Crescent type; productive; berries large, good color and flavor. Per dozen 25 cts; 100, 50c; 1000, \$3.50.

CRESCENT (P)—The best known of all strawberries, and in many places is still the most prolific and profitable. Always a safe variety to plant. Per dozen, 25c; 100, 50c; 1000, \$2.50; 10000, \$20.00.

CYCLONE (B)—Vigorous plant; large, handsome berry; mid-season; productive. Per dozen, 25 cents; 100, 50 cents; 1000, \$3.50.

Edgar Queen (P)—A very large early variety, of good color and fair quality. Plant vigorous and healthy. Should be given a trial. Per dozen, 25 cents; 100, 50 cents; 1000, \$4.00.

Erie (B)—Fine, productive, dark glossy color, large size, perfect form, and excellent quality, *The very best canning berry ever introduced.* Per dozen, 25c; 100, 75c; 1000, \$6.00.

Fountain (B)—Came to us from the West high-

ly recommended as a market berry. Not fully tested. Per dozen, 25c; 100, 50c; 1000, \$3.50.

Glen Mary (B)—A late berry of immense size, good quality, shape, and color. Quite productive. A remarkably promising variety [with strong healthy foliage. Although bi-sexual it is imperfectly so, and we would advise setting the Brandywine or some other strongly staminate variety near it. Per dozen, 50c; 100, \$1.00; 1000, \$8.00.

GARDNER (B)—A strong growing plant producing an enormous crop of good flavored fruit; early. Very rich in pollen, making an excellent fertilizer for pistillate varieties. Worthy of extended trial. Per doz-n, 25c: 100, 75c; 1000, \$5.

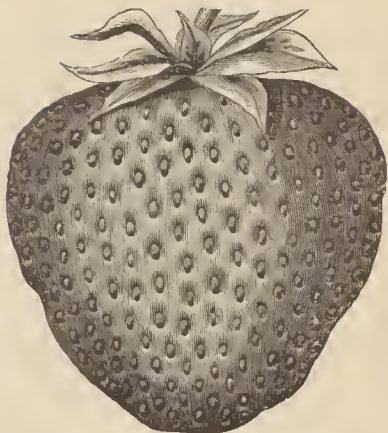

HAYES (B)—Notwithstanding its source and the foolish claims made for it we believe this is a good berry. In size, color, firmness, and quality it is superior to anything else we have as a fertilizer for Haverland, unless it be the Gardner. Per dozen, 25c: 100, 50c; 1000, \$4 00.

HAVERLAND (P)—This variety is unsurpassed in productiveness. Fruit large, long, and attractive. Plant vigorous, berries light in color and poor in quality. Per dozen, 25c; 100, 50c; 1000, \$3.50.

IDEAL (B)—Not fully tested, but what we have seen impresses us favorably. As tastes and markets differ it will probably not be the "ideal" for all of us. Firm, high quality, showy; plant healthy. Per dozen, 35c: 100, \$1.00.

Lovett (B)—A medium sized, mid-season berry of fine form. Productive, firm, and of fair quality. Excellent for fertilizing pistillate varieties. Per dozen, 25c: 100, 50c; 1000, \$3 00.

MARY (B)—A large, late, firm, dark colored variety, giving general satisfaction as a market berry. Quality poor. Valuable. Imperfectly bi-sexual. Per dozen, 25c: 100, 75c; 1000, \$6.00.

ISABELLA.

ISABELLA (B)—Also known as Gandy Belle and No Name. A large, dark red, early, productive variety, giving general satisfaction. Per dozen, 25c; 100, 50c; 1000, \$3.50.

Michels (B)—Small, very early. Per dozen, 25 cents; 100, 50 cents; 1000, \$3.00.

Meeks (B)—Early, small. Per dozen, 25c; 100, 50c; 1000, \$3.00.

Muskingum (B)—Productive; dull color, but good quality. Per dozen, 25c; 100 50c; 1000, \$4.

Noble (B)—Not fully tested; nor very promising. Per dozen, 35c.

ORIOLE (P)—Good size and color; medium to

early; healthy and productive. Per dozen, 25c; 100, \$1.

Parker Earle (B)—A justly popular berry, producing enormous crops of very attractive berries of good size and quality. Firm enough to ship and late enough to sell. Plant very vigorous and deep rooted. Rusts badly. Per dozen, 25c; 100, 75c; 1000, \$5.

Princess (P)—An attractive, large, early berry of good quality. Plant very vigorous. Per dozen, 25c, 100, 50c; 1000, \$3.

PRINCETON CHIEF (B)—A strong healthy plant, producing an abundance of fruit of good size, color and quality. Per dozen, 25c; 100, 50c; 1000, \$3.

Rio (B)—Large for so early a berry. Popular where an early berry is desired. Per dozen, 25c; 100, 75c.

BISMARCK (B)—A seedling of Bubach, said to be later, larger and more productive. Not fully tested. A vigorous promising variety. Per dozen 25c; 100, 75c; 1000, \$6.

Belle (B), Berlin (P) and Bouncer (B)—None of these fully tested or remarkably promising. Per dozen. 25c; 100, 50c; 1000 \$3.

Sharpless (B)—This old standard variety maintains its high place in public estimation on account of its large size and splendid market qualities. On strong land it is often very profitable Per dozen, 25c; 100, 50c; 1000, \$3.50.

Splendid (B)—Firm, good color, large, plant healthy. A promising market variety. Per dozen, 25c; 100, 75c; 1000, \$4.

Sunrise (P)—Similar to Crescent, said to be larger and more productive. Per dozen, 25c; 100, 50c; 1000, \$3.

Sunnyside (P)—Late, productive, medium size, bright color, firm and good quality. Not fully tested. Per dozen, 25c; 100, 75c.

TENNESSEE (B)—A good berry deserving a general trial; one of the best large, productive berries. Similar to Haverland in shape and will be popular as a market berry. Per dozen, 25c; 100, 75c; 1000, \$5.

WILLIAMS (B)—A Canadian candidate for first place as a market berry. If it fulfills half the promises made for it it will prove very profitable. Needs further trial. Per dozen, 35c; 100, \$1.

WM. BELT (B)—Very promising, berries large, regular, bright, glossy, attractive and good quality. Plant vigorous, healthy and productive. Per dozen, 35c; 100, \$1; 1000, \$6.

N. B. The following varieties we shall not grow after this season. Price of any of them until sold: Per dozen, 25c; 100, 40c; \$1000, \$2: Bisel, Bedar Wood, Belmont, Beverly, Eureka, Eleanor, Leader, Oliver, Waldron, Robinson, Tubbs, Warfield and Weston.

BLACK RASPBERRIES.

Ada—Gregg type, small, crumbly, hardy. Per dozen, 50c; 100, 75c; 1000; \$5.

CUMBERLAND.

CUMBERLAND—We have not tested this variety on our grounds, but it comes to us so well recommended, from such a reliable source, that we feel safe in offering it to our customers as a good thing, and one it will be a great mistake to pass by. It is supposed to be a seedling of Gregg fertilized by some blackberry; having the shape and size of the blackberry and the flavor and appearance of the black cap. The fruit is very large and quite firm. Ripens with Kansas. Sells for double the price of common varieties. The plant is perfectly hardy, very productive, vigorous and healthy. Price of plants, each, 50c; dozen, \$4; 100, \$25.

CROMWELL—The earliest blackcap. Ripens its crop in a short time. Not equal to Palmer in yield. Per dozen, 50c; 100, \$1; 1000, \$8.

CONRATH—Promising, Gregg type, not fully tested. Per dozen, 50c; 100, \$1.50; 1000, \$10.

HILBORN—Mid season, jet black, productive and profitable. Per dozen, 50c; 100, \$1.50; \$1000, \$10.

KANSAS—Large as Gregg. Jet black. Early, hardy and of excellent quality. Very vigorous grower and an abundant bearer. Very desirable. Per dozen, 50c; 100, \$1.50; 1000, \$10.

MILLS—A promising new variety from New York. Large, sweet and productive. Mid-season. Per dozen, 50c; 100, \$2.

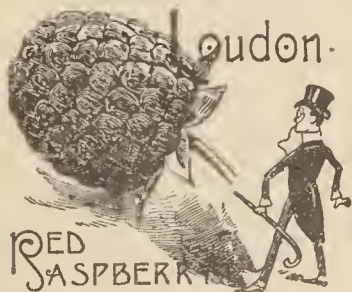

PALMER has been our most profitable black-

cap. Hardy, healthy, early and very productive of jet black berries; good size and quality. Per dozen, 50c; 100, \$1; 1000, \$7.

RED RASPBERRIES.

BRANDYWINE—A bright red early berry superior to many more recent introductions. Per dozen, 50c; 100, \$1.00; 1000, \$8.00.

Cuthbert—Large, late. The favorite in market, the standard, productive. Per dozen, 50 cents; 100, \$1.00; 1000, \$8.

Loudon—Claimed to be an improvement on Cuthbert. Mr. Loudon has grown two hundred bushels per acre, and shipped them to New Orleans from his farm in Wisconsin, where they arrived in good shape. Berries larger and finer than Cuthbert, and plant more hardy and healthy. Per dozen, 50c; 100, \$4.00; 1000, \$30.

Miller—Another small early berry which is quite profitable *where you can sell the plants*. Per dozen, 50c; 100, \$1.00; 1000, \$7.00.

MARLBORO—Probably the best of the early reds, but in many localities does not do well. Per dozen, 50c; 100, \$1.00; 1000, \$8.

SHAFFER (Purple)—Large, rich, productive. Best of its class. Excellent for home use or canning, but soft for a market berry. Per dozen, 50c; 100, \$2.

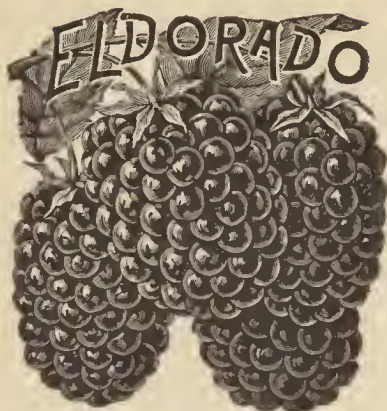

Thompsons—Early, prolific, but not as large or bright as Marlboro. Superior to Miller. Per dozen, 50c; 100, \$1.00; 1000, \$7.

Turner—Early, soft, sweet, fair size, and is sometimes prolific. Per dozen, 50c; 100, \$1; 1000, \$7.

BLACKBERRIES.

AGAWAM—Early, hardy, productive, and sweet. Holds its color well after picking. About the size of Snyder. Per dozen, 50c; 100, \$1.50; 1000, \$10.

ELDORADO—Perfectly hardy, early, good size, and superb quality. The very best home berry ever introduced. Whether it will prove profitable as a market berry is a question. With us it has not proved very productive. Per dozen, 50c; 100, \$2.50.

LUCRETIA (Dewberry)—Properly grown and handled this should prove profitable. Its large size, earliness, and superior quality make it a very salable market fruit. It can be grown on poor land, and one crop will pay for the land several times over. Per dozen, 50c; 100, \$1.50; 1000, \$10.

MINNEWASKI—A fine, large, late variety; quite hardy; produces fruit until frost comes. Per dozen, 50c; 100, \$2; 1000, \$18

RATHBURN—This berry has already established an enviable reputation in the locality of its origin for size, quality, and hardiness. Said to be nearly four times as large as Snyder. Not fruited here yet. Per dozen, \$2; 100, \$12.

Snyder—Early, hardy, productive. The old reliable, always to be depended upon for a crop of medium sized berries of good quality. Per dozen, 50c; 100, \$1; 1000, \$7.

The following varieties we are trying to exterminate on our farm and until sold will furnish at 50 cents per dozen, 50 cents per 100, \$4 per 1000: Bangor, Early Harvest, Early King, Eric, Lovett's Best, Maxwell's Early, Sanford, Stone's Hardy, Taylor, and Wachussett Thornless.

CURRENTS.

CHERRY—The popular large red currant of the markets. Early.

FAYS PROLIFIC—Similar to above and possibly superior in length of bunch and quantity of product.

North Star and Victoria—Small, red, very productive.

Versailles—Medium size, red, productive.

White Grape—Good quality, productive.

Two year, No. 1 plants, per dozen, 50c; 100, \$4.00. One year, No. 1, 100, \$3.00. One year, No. 2, 100, \$2.00

GOOSEBERRIES.

TWO YEARS. STRONG PLANTS.

Downing—Large, green, good quality, productive. Per dozen, \$1.00; 100, \$5.00.

Houghton—The old, well-known, small, red sort. Per dozen, \$1.00; 100, \$5.00.

Red Jacket—A strong growing American variety. Very prolific, large fruit, excellent quality. This marks a decided forward step in Gooseberry culture. Per dozen, \$2.00; 100, \$12.00.

NEW FRUIT BERRIES.

Strawberry Raspberry—Yes, we have a small plat of ground infested with this pestiferous weed, and do not advise any of our customers to go and do likewise. However, if any customer wishes to learn what we have, by expericnce, we will supply the necessary starter gratis. One plant is sufficient, but you can have more.

Logan Berry—This novelty is well worth watching, although it may disappoint us in hardiness. The fruit is large, of richest quality, a distinct and delightfully spicy flavor, which will be appreciated by lovers of choice fresh fruit, and should make a super-quality preserve. A cross between the raspberry and blackberry, a strong grower with extremely healthy foliage. Per dozen, \$2.00; 100, \$10.00.

GRAPES.

TWO YEARS OLD. EXTRA STRONG VINES.

From the seventy varieties of grapes which we have been growing, we have selected the following six as varieties to be depended on every

season in our New England climate to furnish an abundance of fruit of desirable quality.

Brighton (red), Concord (black), Delaware (red), Green Mountain [white], Niagara (white), Worden (black). One vine each above varieties, \$1.00. Green Mountain alone, 50c; other varieties 15c. each by mail, 10c. each by express.

QUINCES.

Orange and Champion. First-class trees of either variety, 25c. each.

APPLES.

Ripening in order named.

Summer—Yellow Transparent, Sweet Bough, Red Astrachan, Golden Sweet.

Autumn—Gravenstein, Maiden's Blush, Fall Pippin, Wealthy.

Winter—Bellflower, Rhode Island, Greening, Talman's Sweet, Northern Spy, King, Wolfe River, Spitzenburg, Hubbardston, Sutton Beauty, Baldwin, Roxbury Russet.

The foregoing is a list of most excellent apples which will supply a country home with fruit for the whole year.

First class trees 5 to 7 feet, each, 25c; per dozen, \$2.00; 100, \$12.00.

Hyslop Crab Apple—First-class, 25c each.

PEARS.

Ripening in order named.

Doyenne de Ete, Clapp's Favorite, Bartlett, Seckel, Bosc. Sheldon, Lawrence, Anjou, Keiffer. Standard, 5 to 7 ft., 25c. each. Per dozen, \$2.50.

CHERRIES.

Black Tartarian—Large, rich, sweet.

COE'S TRANSPARENT—White, sweet, large.

Early Richmond—Large, red, sour.

English Morello—Sour, large, red.

Gov. Wood—Large, sweet, red and white.

LARGE MONTMORENCY—Large, red. The best sour cherry.

Napoleon—Red and white, sweet, large.

SCHMIDTS—Black, extra size and quality.

Yellow Spanish—Large, rich, excellent.

WINDSOR—Strong grower, large, rich, black fruit.

First-class trees, 5 to 7 feet, each, 25c.; dozen, \$2.50.

PEACHES.

A few of the hardiest varieties of good quality, most reliable for New England. Ripening in order named. All free stones except Sneed and Triumph, which are partially free.

Sneed (white), Triumph (yellow), Early Rivers

(white), Mt. Rose (white), F. St. John (yellow), Foster (yellow), Mary's Choice (yellow), Early Crawford (yellow), Champion (white), Reeves Favorite (yellow), Old Mixon (white), Elberta (yellow), Crosby (yellow), Late Crawford, (yellow), Stephens Rareripe (white), Stump (white).

First-class trees, 4 to 6 feet, each 15c; per dozen, \$1.25; 100, \$8.00.

Second size trees, 3 to 4 feet, each 10c; per dozen \$1.00; 100, \$5.00.

We recommend the first size tree as the most satisfactory to buy. The crop grown on one tree will often pay the extra price on one hundred.

It has not been our custom to offer our light trees to our customers, but some insist on having them and buying them direct. We prefer to sell them to our competitors.

CONNECTICUT—A large yellow peach about the season of Early Crawford, freestone, good quality, hardy. Double price of common varieties. This and Elberta will be largely planted in Connecticut this season.

EUROPEAN PLUMS.

Bradshaw—Large, early, purple, good quality. August.

Coe's Golden Drop—Large, sweet. September.

LOMBARD—Medium, red, productive, popular. August.

Quackenboss—Large, purple. September.

Reine Claude—A fine late plum, green. September.

Shropshire Damson—The best damson, small; purple, popular for preserving. October.

First class trees, 5 to 7 feet, each, 25c; per dozen, \$2.50.

JAPANESE PLUMS.

These plums are deservedly attracting much attention at present, as their quality is much better than at first supposed and the trees are not subject to black knot. The fruit is more free from rot and suffers less from curculio than our common plums.

The past season we have shipped these plums in ordinary crate as far east as Lewiston, Maine, and west as far as Urbana, Illinois. All report fruit as arriving in perfect condition. Our fruit has been shipped to every state in New England and the markets are now ready for a liberal supply. Buy your trees from those who have growing orchards and know what varieties they are sending out. The benefits of our practical experience is always at our customers' service. Ask questions and advice freely.

ABUNDANCE—A large handsome plum of superb quality. The past season it sold readily in our markets for double the price of peaches and California plums, and easily had the preference when it became known. Season early. August.

Berckmans—Same season as Abundance, but smaller, and every way inferior.

BURBANK—Very productive, large, handsome, and popular variety. Our trees of this variety, when loaded with ripe fruit, presented the handsomest fruit picture it was ever our privilege to look upon. The *Rural New Yorker* of September 18, 1897, says: "The handsomest plums we have ever seen were sent to us by BUTLER & JEWEL, nurserymen, of CROMWELL, CONN.—Burbanks. They were all about the same size, and measured $6\frac{1}{2}$ inches either way in circumference, and were therefore nearly round. In quality they seemed a shade better than Abundance while resembling it in color of flesh, juiciness, and meatness."

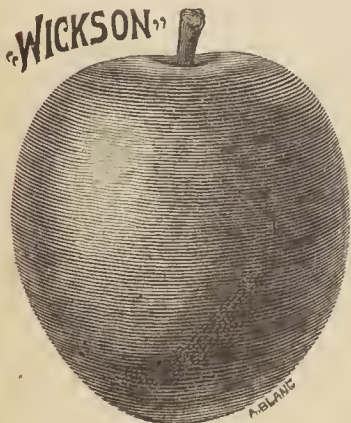

NOTE.—The above comparison is hardly fair as our Burbanks were compared with someone else's Abundance. Ninety-five per cent of our customers said our Abundance were even better than our Burbank, in fact called them the very best eating plum they ever tasted.

CHABOT (Also sold under the names Chase, Bailey, Yellow Japan, Botankio, Hattankio, and Orient)—Medium to large, handsome fruit which sells readily at top prices. Coming at a convenient season for canning—September. It resembles our European plums when canned. An extra good keeper.

HALE—A very strong growing tree. Not fruited here yet. Prof Bailey says of it: "Best in quality of any Japan Plum." Luther Burbank (originator) says: "Will yield enough to suit anybody." Ripens last of August to first of September. Our trees of this variety are on peach roots. All other plum trees on plum roots. First size trees, each 50c; second size, each 35c.

NORMANDS—Finest of the yellow skinned Japanese varieties. Size medium to large. August. Worthy of trial.

Red June—Medium size, very hardy and productive. Best early variety. July.

Wickson—Mr. Burbank considers this the very best of the Japanese type of plum. Very large, handsome glowing carmine color, flesh of fine texture, firm, sugary and delicious; small stone, good keeper, Late September. Tree and bud as hardy as Burkank. One man reports a three foot tree, purchased last spring, as maturing three plums the past season. The smallest trees of this variety we offer this season are larger than the tree which bore these plums was when set. Be sure and secure a stock of this grand variety. We have the largest stock in New England.

Satsuma (Blood Plum)—A very large, solid-fleshed late plum. Canned or preserved it has no equal. We sold our entire crop of this variety the past season at \$3.50 to \$4 per bushel at wholesale.

Willard—Small, red, productive. The earliest of the Japan plums.

All plums are budded on plum roots and prices are as follows except where noted.

	Each	12	100
First class trees, 5 to 6 ft...\$0 25	\$0 25	\$2 50	\$18 00
Second size, 4 to 5 ft.....	20	2 00	15 00
Third size, 3 to 4 ft.....	15	1 50	10 00

We have for trial the following more recent importations of Japanese varieties, and if any of our customers wish to try them we will furnish small trees (4 feet) at 35 cents each, or the collection of twenty for \$5.

Georgeson, Paragon, Mam, Okute Smomo, Excelsior, Funegiya, Honsmomo, Hanan Kayo, Mikado, Negate No Botankyo, O Hatankyo, Sagetsuma, Unknown, White Kelsey, Wassn. Wasse Botankyo, Wasse Sumomo, Weeping Blood, Yeddo, Yone Mono.

POULTRY DEPARTMENT.

Eggs for hatching from selected birds of the most profitable and popular business breeds.

Barred Plymouth Rocks (America's Business Hen)—\$1 00 per 13.

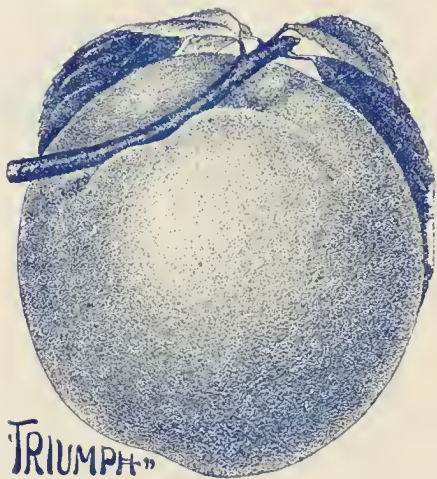

Rouen Ducks—With us much more hardy, satisfactory and profitable than Pekins. \$1 per 11.

Mammoth Bronze Turkeys—Fine large birds mated with 43 lb. gobbler; \$2.00 per 9.

Toulouse Geese—25c. each.

Our fowls are in small flocks, properly mated, and have farm range.

Prices of birds a matter of correspondence depending on individual merit. No stock now for sale except a few Barred P. R. Cockerels.

TRIUMPH
